

Stainless Works New Product Announcement

Stainless Works announces a new line of 304L SS mandrel bent headers and exhaust products for the 2002-2009 Trailblazer 4.2L 6 Cyl. Headers are available with either 1-5/8" or 1-3/4" dia. primaries with dual 2.5" slip fit collectors. Headers packages are available with 2.5" dia catted or offroad leadpipes to fit either the factory connection point or 3" leads to fit the Stainless Works True Dual Exhaust. We have a single 3" catback exhaust system and a dual exhaust with Y-pipe to fit the factory connection point, as well as a true dual exhaust to mate up with our headers. All exhaust systems have 4" rolled edge polished tips. The single exits on the right side under the rear bumper, with the duals exiting under the bumper on either side of the spare tire.

Part Number	Year	Make	Model	Engine	Diameter	List Price	Weight
TB6HDR	2002-2009	Chevy	Trailblazer	4.2L 6 Cyl	Headers with 1-3/4" primaries with 2.5" collectors	\$740.00	40lbs
