

# Stainless Works New Product Announcement

Stainless Works introduces its redesigned long tube headers, center sections and catbacks for the **2005-2010 C6 Corvette**. Manufactured from 304 SS with 3/8" thick 304 SS CNC laser cut flanges, headers are made with 1-3/4" dia. primary tubes. Header kits are available with either hi flow metal matrix Catted or Offroad 3" leads and Catback Exhausts with X-Pipes, overaxles and mufflers with quad double wall polished SS tips. Stainless Works is the first to offer a 3" center section with axleback exhaust to fit our headers and the first to offer a dual 3" catback exhaust for manifolds with 3" X-Pipe and overaxles that fit both the automatic and six-speed C6! Our exhaust systems are available with two optional muffler sounds (S-Tubes – more aggressive, Chambered – more subtle musclecar) and with either quad 3.5" or 4" double wall polished SS tips.

Part Number	Year	Make	Model	Engine	Diameter	List Price	Weight
C63HDRCAT	2005-2010	Chevrolet	Corvette C6	LS2/LS3	1.75" Primaries, 3" Catted Center Sect. w/ X-Pipe, overaxles, chambered turbo mufflers and Quad 3.5" tips	\$2,850.00	110 lbs
