

Stainless Works New Product Announcement

Stainless Works announces their new 3" 304L SS Downpipe and Catback Exhaust System for the 2007-2010 2.3L MazdaSpeed3. The 3" Downpipe is available in both an offroad and high flow metal matrix catted version. Each has a 304 SS flex joint to reduce vibration and comes with all the necessary clamps and hangers. The 3" catback contains a 3.5" dia smooth tube muffler, mirror polished 304 SS tip and all clamps and hangers. Both the downpipe and catback fit the factory connection points, so they can be installed either in combination with factory components or as a full assembly. Dyno proven for up to a 20 horsepower gain with factory tune.
