

## Stainless Works New Product Announcement

Stainless Works announces the introduction of our new line of **Stepped Headers** in a U-Weld It kit for the performance car enthusiasts. The kits include (2) 3/8" thick 304L CNC Laser cut flanges of your choice, (4) 90 degree 304L SS bent primary tubes with 6" legs and (10) 180 degree J Bends 304L with a 6" and 12" leg for each, along with 304L SS filler diamonds and formed weld-on collectors. The use of 308 SS filler rod is recommended for welding these headers together. Ideal for high performance and special applications where standard headers simply won't fit the need. The following tubing sizes are available: 1.50, 1.625, 1.750, 1.875, 2.00, 2.125, 2.25, 2.50" dia. Any flange configuration can be provided from our vast library or we can duplicate from your manifold or gasket. One example of 2" dia primaries and 2-1/8" dia secondaries with Big Block Chevy Flanges is shown below. List Prices Start at \$799 per set.
