

# Stainless Works New Product Announcement

Stainless Works introduces its redesigned extra long tube headers for the **2006-2011 C6Z06 Corvette**. Manufactured from 16 gage 304 SS with leak proof 3/8" thick CNC laser cut D-shaped, port matched flanges, these headers are dyno proven (with a tune) to make 53 RWHP more than stock manifolds. Headers are available in 1-7/8 or 2" dia., 31" long primary tubes, and include all necessary components for installation. Header kits are available with either Hi Flow metal matrix Catted or Offroad 3" Center Sections with X-Pipes to connect to the factory or aftermarket Axleback exhaust systems. Because of the close proximity with the transmission oil cooler lines, a rerouting kit is included to reroute the lines and maintain the proper effectiveness of the system. Our Axleback exhaust systems are available with two optional muffler sound (S-Tubes – more aggressive, Chambered – more subtle musclecar) and with either dual 3.5" or quad 4" double wall polished SS tips. Quad Tip mufflers are mirror polished as well.

Part Number	Year	Make	Model	Engine	Diameter	List Price	Weight
ZO6178CAT	2006-2011	Chevrolet	Corvette C6ZO6	7.0L	1.88" Primaries, 3" Catted Center Section w/ X-Pipe	\$1,950.00	72 lbs
ZO6178OR	2006-2011	Chevrolet	Corvette C6ZO6	7.0L	1.88" Primaries, 3" Offroad Center Section w/ X-Pipe	\$1,650.00	68 lbs
ZO62CAT	2006-2011	Chevrolet	Corvette C6ZO6	7.0L	2" Primaries, 3" Catted Center Section w/ X-Pipe	\$1,950.00	76 lbs
ZO62OR	2006-2011	Chevrolet	Corvette C6ZO6	7.0L	2" Primaries, 3" Offroad Center Section w/ X-Pipe	\$1,650.00	72 lbs
ZO6CTR	2006-2011	Chevrolet	Corvette C6ZO6	7.0L	3" Center Section with X-Pipe to fit OEM Conn. Points Front & at Axleback	\$590.00	22 lbs
